Testimonial for Nick Sugars and Garden Concepts

It was a delight to work with Nick Sugars of Garden Concepts to have our garden with low water use, Australian plants and vegetable growing areas installed in winter 2010. Nick was very good to talk with about the design and installation process for our garden, and he was very clear about how the work would be done and when he would start and complete different elements of the plan.

Nick was also very adaptable and was able to accommodate changes in the design of our decking and plant selection without incurring any extra costs or delaying the work. He and his very efficient, friendly team completed high quality work, were very tidy and considerate and completed the installation of our garden on time and within budget.

Twelve months later, we are very happy with how the garden has developed and now enjoy the lovely outdoor area he has created, complete with connecting pathways and crushed limestone stepping stones. We have no hesitation in highly recommending Nick and his team for producing an excellent result with our finished garden.

Best wishes

Neil and Frances with Sascha and Ella
